LAB ASSIGNMENT 3

Exercise 1

Create a simple sticky note web site. This Sticky note program is a used to store notes. Each note must be stored with its title. All the notes and titles must be stored in a text file (Sticky_note.txt) **Figure. 2.(Score: 5 marks)**

*Remember: The sticky note will only show the finally entered note. Also, In the foot note the added note count should be shown **Figure 1.**

Figure **1 Expected Result**

Figure 2 Content of Sticky_note.txt

Exercise 2

Write a PHP script that accepts one GET request parameter size (variable), and displays images formed into a triangle shape with the height of that size. **fig. 3.(Score: 5 marks)**

***Hints:** Use <img src="filename.png" width="20" height="20"> to display an image (tri_sq.png). Also, you can put the image to a table or use the width and height to get a proper scaling of the triangle.you can also use sticky.css as the styling file too

Figure 3 Display Expected Result when enter 7 as parameter
